

What I should already know:

Leaves change colour and start to fall off trees in autumn.
 It is cold in winter and sometimes snows.
 Leaves grow on the trees in spring.
 Some trees have fruit in the summer.
 It is hot during the summer months.
 That plants have grown from seeds and how we cared for them.

By the end of EYFS:

Children can describe the physical changes they notice on and around a tree during the season of autumn.
 Children can describe the observations of the weather they have made on a winter day.
 Children can describe the physical changes they notice on and around a tree during the season of spring.
 Children can describe the physical changes they notice on and around a tree during the season of summer.
 Children can describe the observations of the weather they have made on a summer day.
 Children can name the fruit and vegetables that they have grown, describe how they cared for the plants and the changes they noticed.

What is happening to the trees in Autumn?

Autumn
 Deciduous trees
 Fruit
 Seed head
 Season
 Winter

What is the weather like today? (Winter)

Cold
 Frozen
 Temperature
 Weather: cloudy, rainy, snowy, foggy, windy, stormy

Freeze
 Season
 Winter

What is happening to the trees in Spring?

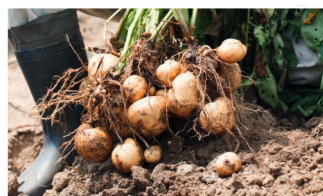

Blossom
 Buds
 Deciduous
 Insect
 Season
 Spring & Winter

What is happening to trees in summer?

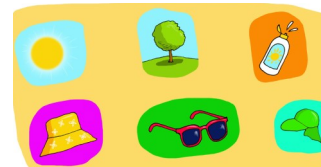

Buds
 Deciduous
 Flowers
 Fruit
 Season
 Summer

What can I grow for my dinner?

Flower
 Leaf
 Plant
 Potato
 Root
 Seed
 Stem
 Vegetable

What is the weather like today? (Summer)
